Summary

Computer Science student at VIT Bhopal with hands-on experience in full-stack web development, mobile engineering, and test automation. Built production apps with React, Next.js, Django, and Flutter; designed REST APIs and CI/CD pipelines on AWS, Azure, GCP, and Oracle OCI. Seeking software engineering roles to build scalable, high-impact products.

Skills

Languages: JavaScript · TypeScript · Python · Java · C++ · SQL

Frameworks & Libraries: React · Next.js · Node.js · Django REST Framework · Flutter · Tailwind CSS · Flask

Cloud & Infrastructure: AWS · Azure · GCP · Oracle OCI · Docker · CI/CD · Ansible · Grafana

Data: PostgreSQL · MongoDB · SQLite

Tools & Practices: Cypress · Page Object Model · Postman · Azure DevOps · Git · REST APIs · Agile · QA/UAT

Experience

Dynamatix Services Pvt. Ltd. (formerly Transition Computing India)

Hyderabad, India

Junior Intern

July 2025 – June 2026

- Built **Cypress + TypeScript** end-to-end test automation for a production fintech web platform across QA and UAT environments.
- Developed **Page Object Model** test suites for core product modules including commitments workflows, affordability dashboards, and information requests.
- Expanded smoke and regression coverage; built **Node.js** automated HTML test-report pipelines to support agile release cycles.
- Hardened large E2E test suites with robust selectors, session recovery, and environment-aware fixtures.

Dynamatix Analytics Pvt. Ltd.

Hyderabad, India

Software Development Intern

May 2025 – June 2025

- Performed **UAT/QA**, **API testing** with **Postman**, and **bug tracking** in **Azure DevOps** across backend services built with **Node.js**, **TypeScript**, and **MongoDB**.
- Validated REST endpoints, reproduced issues, and supported engineers through **SDLC** and **Agile** sprint workflows.

Projects

Veil Android

April 2026 - Present

Mobile Application · April 2026

- Lead mobile engineer on a production **Flutter** Android app integrating TMDB metadata with **REST APIs** to an OMSS resolver hosted on **Oracle Cloud (OCI)**.
- Built adaptive phone/tablet/TV UI, ExoPlayer HLS/DASH playback, Hive persistence, and shipped **50+ CI/CD releases** via GitHub Actions.
- [GitHub](#)

Bitcoin Signet Observability

March 2026

DevOps / Observability · March 2026

- Solo-built production observability stack on an **Azure VM** (Ansible-provisioned): Grafana Alloy → Loki → Grafana with 14-panel dashboard, LogQL recording rules, and Telegram alerting.
- Implemented dual-firewall security (**Azure NSG** + UFW), Docker Compose deployment, and reproducible infrastructure-as-code across 3 Ansible roles.
- [GitHub](#)

NutriAtlas

April 2026

Health Tech Web Application · April 2026

- Deployed a **Next.js 15** health and nutrition dashboard on **GCP Cloud Run** with responsive UI, Recharts analytics, and Docker + Cloud Build CI/CD pipeline.
- Built scalable frontend widgets and containerized production deployment with standalone Next.js output.
- [Live demo](#) | [GitHub](#)

CHEM•VIZ

February 2026

Full-Stack Web Application · February 2026

- Solo-built full-stack platform with **Django REST API** backend and **React** web app sharing one API across web, hosted backend, and desktop clients.
- Designed REST endpoints for CSV ingestion, token auth, KPI dashboards, and PDF export with live production deployments.
- [fossee-web.vercel.app](#) | [GitHub](#)

SPARTA

February 2025

AI / Security Automation · February 2025

- Co-developed an automated phishing detection system using **scikit-learn**, **Flask REST API**, and a Chrome extension for real-time URL analysis.
- Built end-to-end ML pipeline from feature extraction to inference API and browser integration.
- [GitHub](#)

Education

VIT Bhopal University

2023-2027

B.Tech Computer Science & Engineering (Cyber Security & Digital Forensics) | CGPA 8.54

Bhopal, India
