Experience

Dynamatix Services Pvt. Ltd. (formerly Transition Computing India)

Hyderabad, India

Junior Intern

July 2025 – June 2026

- Built and maintained a **Cypress + TypeScript** E2E automation framework for a production **fintech SaaS** web platform across QA and UAT.
- Expanded **Page Object Model** coverage for core product modules — commitments workflows, affordability dashboards, and information requests — keeping smoke and regression suites release-ready.
- Wrote **Node.js** HTML test-report pipelines so product and engineering teams could see sprint readiness before deploy.
- Used API fixtures, session recovery, and environment-aware configs to keep large regression suites stable across releases.

Dynamatix Analytics Pvt. Ltd.

Hyderabad, India

Software Development Intern

May 2025 – June 2025

- Ran **UAT/QA** and **Postman** API validation on **Node.js/TypeScript/MongoDB** backend services; logged defects in **Azure DevOps**.
- Reproduced production bugs, verified REST contracts, and worked with engineers through **Agile** sprints before each release.

Projects

Veil Android

April 2026 – Present

Flutter · REST APIs · ExoPlayer · Riverpod · CI/CD

- Lead mobile engineer (109 commits) on a production **Flutter** client: TMDB catalog, **REST API** integration to an OMSS v1.0 resolver, adaptive phone/tablet/TV UI, and local persistence (Hive).
- Rebuilt playback on native ExoPlayer (HLS/DASH); shipped **50+** signed releases via GitHub Actions.

Relic — Learning & Payments Platform

January 2026 – May 2026

Next.js 14 · TypeScript · Express · MongoDB · Stripe

- Solo full-stack build: **Next.js 14** App Router with JWT auth, shopping cart, **Stripe** checkout, custom YouTube course player with lesson progress, reviews, and admin dashboard.
- Built **Express + MongoDB Atlas** REST APIs on Vercel; seeded 6 courses / 174 lessons with role-based access and dark mode.
- [Live demo](#) | [GitHub](#)

SPARTA — URL Security Service

February 2025

Python · Flask REST API · scikit-learn · Chrome Extension

- Built a **Flask REST API** serving a trained **scikit-learn** classifier for phishing URL detection; Chrome/Edge extension calls the API for on-page and manual checks.
- End-to-end pipeline: feature extraction → model inference → user-facing alerts (**95%** accuracy on test set).
